

# TANDEM

SHAPING FLEXIBLE LEARNING PATHWAYS

The TANDEM project aims at enhancing the flexibility in learning pathways across education systems (from EQF levels 4 to 5 and 6) by connecting Vocational Education and Training (VET), Higher Education (HE) and the business world.

The word “TANDEM” should emphasize the efficiency of businesses, VET and HE providers working together for high quality VET aligned with regional and global labor market demand.

# TANDEM

SHAPING FLEXIBLE LEARNING PATHWAYS

## OBJECTIVES

To provide high quality VET aligned with regional and global labor market needs to respond to emerging skills' shortages.

To outline the possibilities for workers and lifelong learners by developing VET programs delivering specific modules to prepare students for HE by offering bridge courses and taking work experience/training into consideration.

To outline the transferability between Higher Vocational Education and Training (HVET) to Short Cycle Higher Education (SCHE) and from HVET or SCHE to Bachelor's programs through a clear and coherent credit transfer system.

## IMPACTS

Fostering growth and jobs: The transferability of VET students to tertiary education is important to upskill both students and employees. The aim is to provide the right skills that match the labor market needs and support employability throughout workers' career.

Allowing innovation since the implementation and production of new technologies depends on the availability of highly qualified people.
